Please view the Code of ethics on my Weebly site and answer the following questions.

1. What are the broad categories of the code of ethics? (9)

2. How many responsibilities do physicians have to consider in total?

3. Consider #4. What sorts of things could affect the overall health “of society?”

4. What sort of interference is #7 addressing?

5. Why do you think number 10 is included?

6. What is a conflict of interest (11), how could it interfere with medical decisions?

7. Discuss/create a situation where #15 may be relevant.

8. Rewrite #23, what does it mean?

9. Why should #25 be of considerable interest to you. Create/discuss a situation where this would be important.

10. Why does #29 relate to the current case study?

11. What types of third parties should have access to patient information, and which shouldn’t? (#35-37)

12. Create a fictional research study which would make #38 become important. Then research a REAL, CURRENT medical study and how medical ethics are considered.

13. Why is health education included in #42?

14. Discuss the role of professional athletes and #43

15. What stress factors may be associated with #53 and why is this important?
